

CASE STUDY

Elements Primary School

CLIENT

McAvoy Group

LOCATION

Acre Terrace, Leeds

Enabling works, including **removal of fly-tipped soils for school development**

THE OBJECTIVE

To re-profile the site to design levels and remove excess soils to appropriate facilities

THE ISSUES

The segregation, treatment and disposal of unsuitable soils affected by fly tipping whilst working in close proximity to an operational primary school

THE FORTITUDE SOLUTION

- Made ground containing asbestos and deleterious materials were processed over a picking station by appropriately trained and experienced personnel
- To provide a 'value added' service to the client by using our experience in remediation and waste management
- Works were undertaken in a safe and sensitive manner including continual liaison with an operational primary school adjacent to the site
- Remediation completed within programme and budget including incorporating design changes during works
